Re: American Towers LLC Collo Certification
ATC Site No: 282331 / Site Name: Pleasant Hill NC/ AT&T ID: 368-770

American Towers LLC ("ATC") is one of the leading independent owners and operators of shared wireless infrastructure. The core business of ATC involves the engineering, deployment, marketing, ownership, operation and leasing of shared wireless communications sites. The sharing of infrastructure lies at the heart of ATC's business philosophy. ATC's facilities are designed for multiple collocation opportunities for our customers. We endeavor to assist communities in reducing the number of towers in a given jurisdiction by supplying our customers with locations that are ready for them "Just in Time" for coverage design and wireless performance needs. As one of the largest tower companies in the world, ATC has master lease agreements, negotiated at arms-length, with all major wireless carriers' licensed to operate in North Carolina. In negotiating the rental rates of these master lease agreements, ATC considers the competitive environment of its business and presence of other major tower companies, such as Crown Castle and SBA. This ensures that ATC charges only reasonable rates to service providers.

COLLOCATION CERTIFICATION

ATC agrees to comply with the Chatham County Wireless Telecommunications Ordinance, specifically Section 2-3 (2) (f), and agrees the proposed wireless support structure will be made available for collocation to other service providers, provided space is available, the provider's communications equipment does not interfere with the primary purpose of the tower, that such other users agree to negotiate a reasonable compensation to ATC from such liability as may result from such attachment and provided the collocation is consistent with Article 2 of this Ordnance.
