DIVISION 4 DISTRICT 1
DEPT. OF TRANSPORTATION

As requested by letter of September 29, 2005, an office review of subject proposed 60" RCP has been made.

The proposed 60" RCP is proper size to meet current desirable design criteria for acceptance onto the state system for maintenance. A headwall is required on the inlet end. The pipe should be long enough to accommodate 2:1 fill slopes from shoulder point to top of pipe.

If further assistance can be provided, please contact this office.
