Subject: Lystra Road Subdivision

Planning Board:

Please request that the Lystra Road Development should have turn lanes at its entrances and also have the speed lowered between the Governor's Club and Harris Teeter. This is a popular cut through for people traveling to Durham, Jordan Lake, and Apex. Motorcycles like to travel along here on weekends. The location of this development is by a bend in the road downhill from where I live at the intersection of Lystra estates Dr. and Lystra Rd. Cars travel along this road 60+mph. Already we leave from our development with great care, because by the time you see a car it is already on top of you! I would hate to have someone killed in an accident here. Please prevent this from happening!

Thank you!
Barbara Dickinson
