Mr. Farrell

That is correct we will make the 4 taps from the 6" water main on Farrington Point Rd. the meters will be on the front corner of that lot on Farrington Point Rd. Then you will run the customers line from each meter to there lots. There is already 1 meter there and that will give him the 5 total for his needs.

Thanks  
Roy L. Lowder

**Subject:** Fwd: 5 water meters @ Farrington Point & McGhee intersection

Roy

As per our conversation on Thursday August 10, 2006, please send me an email that I can pass on to the Planning Dept stating that you want to put 5 meters on the corner lot at the Farrington Point/McGhee Rd intersection and have me run the lines from the meter to each lot. There is already 1 meter on the site, so we just need to add 4 more.

Thanks
