

To whom it may concern. My name is Benny Goldberg. I am employed with Progress Energy. My normal work station is the Cape Fear Plant located in Moncure, NC. As a “shared resource” my job carries me to other Power Plants within the Progress Energy system. When working out of town I meet lots of people who make their living on the road. Often times when people find out I work in Moncure, NC they ask me if I can recommend a campground where they can stay during the Shearon Harris refueling outage. I have recommended local campgrounds many times. Some of the people I have spoken with have specifically asked for more private campsites and even have asked about trees which I assume they like for shade purposes. I am very familiar with Mr. Houses proposal for a campground and believe it to be the kind of place these people are interested in staying while working in the Moncure, NC area. I have spoken with the following people and they have shown an interest in possibly renting a space at Mr. Houses proposed campground should it be approved.

To Whom It May Concern:

Trans-Ash would be interested in using Mr. House's camp ground in the future. At times, we could have seven to eight units using his facility.
