## I. Summary

At the request of Lewis Metty Development Company LLC, a Phase I Environmental Site Assessment (ESA) was performed for a 162 acre site in Chatham County, North Carolina (PIN #'s 9756-26-2681.000, 9746-95-7113 and 9756-15-6332.000). The site is owned by Charles E. Lewis, of Lewis Metty Development Company LLC and located in Pittsboro, south of Orange/Chatham county line, and south-east of Jones Ferry Road. A portion of the property's western boundary is defined by Meadow Branch, perennial stream. A site map, which includes a 2002 Chatham County GIS aerial photograph, is included with this report (*Exhibit A*).

The ESA performed for this site was completed in accordance with ASTM Practice E 1527-05 and included interviews with current owner, past owners, research of environmental database records, historical records and a site visit. Additionally, adjacent properties were visually evaluated while traversing the subject property boundaries, via windshield survey and/or through evaluation of historical aerial photographs.

The majority of the site is covered by mature forest vegetation that has been thinned. The remainder of the site is covered by successional forest vegetation at varying stages of maturity. There are several piles of logged trees scattered throughout the property. One old logging path exists that begins below the southern property line and leads northeast to an old home site, located in the northwestern portion of the subject property. Around the old home site are several piles of trash including glass, tires, etc. During the initial site visit, minimal debris was observed throughout the property. This debris included trash, and other debris typical of rural properties. According to the Bynum, NC, USGS topographical quadrangle map, the subject site disposes the majority of its storm water runoff into Meadow Branch and the rest to eastern and southern adjacent properties. This assessment has revealed no evidence of major recognized environmental conditions in connection with the subject properties.

An environmental database report for the property was supplied by FirstSearch Technology Corporation. This report was completed in accordance with ASTM Practice E 1527-05. No sites of environmental concern were identified in the report.

As a result of the ESA performed on this site, the following recommendations should be considered during development and/or site preparation:

1. All miscellaneous containers should be removed from the site along with their contents and properly disposed of. Care should be taken to protect workers from potentially asbestos, lead, UFFI or other hazardous waste containing materials disturbed or encountered during site cleanup;
2. All debris should be removed from the site and properly disposed of;
3. All structures, structural remnants and their contents should be removed from the site and properly disposed of. Care should be taken to protect workers from potentially asbestos, lead, UFFI or other hazardous waste containing materials disturbed or encountered during demolition and/or removal of structures, structural remnants and their contents;

4. Any water supply wells and/or septic tanks discovered during site preparation should be properly abandoned per state and federal regulations and guidelines and;
5. Any petroleum contaminated soil should be collected and removed from the site per state and federal regulations and guidelines.

## **II. Introduction**

Lewis Metty Development Company LLC requested from Mitchell Environmental P.A., the completion of a Phase I Environmental Assessment for the 162 acre site illustrated in Exhibit A. The site is located southeast of Jones Ferry Road, SR 1540 in Chatham County, NC.

The purpose of the ESA is to provide Lewis Metty Development with a comprehensive environmental evaluation of the property consistent with ASTM Practice E 1527-05 and that meets requirements of the Comprehensive Environmental Response, Compensation and Liability Act (*CERCLA*) and the Superfund Authorization and Reauthorization Act (*SARA*).

The Scope of Services for this project included the following tasks:

1. Evaluation of reasonably ascertainable environmental database records and historical records,
2. Interviews with current and previous land owners and local emergency response personnel.
3. Site reconnaissance, and
4. Report preparation, including recommendations for additional investigations, if warranted.

## **III. Site Description**

Two site evaluations were completed for this Phase I ESA Report. The first was conducted on March 5, 2007 and the second, including thorough perimeter evaluation, was conducted on May 8. The sky was clear during the site investigations. The site has been mostly cleared with some forest vegetation of varying ages left. The subject site disposes the majority of its storm water runoff into Meadow Branch and the rest to eastern and southern adjacent properties. Evaluation of historical aerial photos (1938, 1951, 1966, 1983) illustrate that the subject property was partially forested and cleared for farming during the 1930's but was abandoned from agriculture uses during the 50's and 60's.

#### **IV. Records Review**

An environmental database report for the property was supplied by FirstSearch Technology Corporation. This report was completed in accordance with ASTM Practice E 1527-05. No sites of environmental concern were identified in the report. The following databases and sources were researched:

##### **Federal ASTM**

*NPL* – National Priority List

*NPL DELISTED* – National Priority List subset

*CERCLIS* – Comprehensive Environmental Response, Compensation and Liability Information System

*CERCLIS NFRAP* – Comprehensive Environmental Response, Compensation and Liability Information System Archived Sites

*RCRA CORRACTS* – Resource Conservation and Recovery Information System Corrective Action Sites

*RCRA TSD* - Resource Conservation and Recovery Information System - Treatment, Storage and Disposal Facilities

*RCRA GEN* - Resource Conservation and Recovery Information System - Large and Small Quantity Generators

*RCRA NLR* - Resource Conservation and Recovery Information System – sites No Longer Regulated

*FEDERAL IC/EC* – Federal Institutional & Engineering Control Sites

*FEDERAL IC/EC* – EPA Brownfield Management System

*ERNS* – Emergency Response Notification System

*TRIBAL LANDS* – Indian Lands of the United States

*FINDS* – The Facility Index System

*STATE/TRIBAL EC* – Individual States’ Engineering Control Sites

*STATE/TRIBAL IC* – State Inactive Hazardous Sites List subset

*STATE/TRIBAL VCP* – Individual States’ Voluntary Clean-up Sites

*STATE/TRIBAL BROWN* – NCDENR Brownfield Projects Inventory

##### **Federal Non-ASTM**

*HMIRS* – Hazardous Materials Incident Response System

*NCDB* – National Compliance Database

*NPDES* – National Pollutant Discharge Elimination System

*NRDB* – National Radon Database

*Nuclear*

*PADS* – PCB Activity Database System

*Receptors*

*AIRS* – Aerometric Information Retrieval System

*DOCKET* – Integrated Compliance Information System

*RELEASES* – Air and Surface Water Releases

*Soils*

*TRIS* – Toxic Release Inventory System

*Federal Wells* – USGS Groundwater Inventory Sites

### **North Carolina**

*IHS* – Inactive Hazardous Waste Sites

*NFA* – No Further Action Sites

*DS* – Duplicate Sites

*SPL* – Inactive Hazardous Waste Sites Priority List Sites

*SWF* – Solid Waste Facilities

*UST* – Underground Storage Tanks

*Incident List* (leaking tanks included in this list)

*Brownfields* – NCDENR Inventory of Brownfields Projects

The subject site does not appear on any list included in the database report.

The current USGS 7.5 minute topographical map (*Exhibit B*) confirmed the general site topography noted above. Additionally, the 4 years of historical aerial photos (*1938, 1951, 1966, and 1983*) that were reviewed as part of this ESA illustrate the historical uses of the subject properties.

### **V. Site Reconnaissance**

Two site evaluations were conducted for this Phase I ESA Report (March 5 & May 8, 2007). The majority of the site has recently been thinned leaving some forest vegetation of varying ages covering most of the site. There are several piles of logged trees scattered throughout the property. One old logging path that begins below the southern property line and leads northeast to an old home site on the northwestern portion of the subject property, was observed during the site evaluation. Around the old home site are several piles of trash including glass, tires, etc. During the initial site visit, minimal debris was observed throughout the property. This debris included trash, and other debris typical of rural properties. According to the Bynum, NC, USGS topographical quadrangle map, the subject site disposes the majority of its storm water runoff into Meadow Branch and the rest to eastern and southern adjacent properties. This assessment has revealed no evidence of major recognized environmental conditions in connection with the subject property. Photographic documentation of this site reconnaissance is included in Appendix B.

### **VI. Interviews**

As part of this ESA, Mr. Thad Bingham was interviewed on March 23, 2007. Mr. Bingham personally owned the lower 125 acre parcel for two years until recently selling it to Lewis Metty Development. Mr. Bingham's father owned the property beginning around the 1950's until ownership was given to his son. Mr. Bingham was not aware of any past, present or potential recognized environmental conditions on the subject property or adjacent properties. The combination of; the records review, site reconnaissance, and interviews with current and past property owners do not indicate any

major existing environmental conditions on the subject site. Previous owner of the north section of the site, Mr. Marvin Meecham, was not available for interview. In addition, North-Chatham Fire Chief, Mr. John Strowd, confirmed that no emergency response records were found relating to this site.

## **VII. Findings**

### Asbestos

No asbestos sampling was conducted on the subject site, however, there is a minute potential for asbestos within debris piles and structures on the site.

### Hazardous Waste

No hazardous waste was observed on the subject site, however, there is a minute potential for hazardous materials within debris piles and structures on the site. Mr. Thomas Bender, the Chatham County Fire Marshal was contacted March 23, 2007. He was unaware of any hazardous spills at or near the subject site in the past 14 years.

### Lead

No lead containing materials were observed on the subject site, however, there is a minute potential for lead containing materials within debris piles and structures on the site.

### Pesticides / Herbicides

Pesticides or herbicides were observed on the site. However, there is a minute potential for pesticides or herbicides within debris piles and structures on the site.

### Polychlorinated Biphenyls (PCBs)

No structures containing PCBs were observed on the subject site.

### Radon

No radon testing was conducted on the site. The database report does lists a radon concentration of 0.3 PCI/L for this area.

### Underground Storage Tanks (USTs)

No underground storage tanks were observed on site.

### Above Ground Storage Tanks (ASTs)

No above ground storage tanks were observed on site.

### Urea Formaldehyde Foam Insulation (UFFI)

No Urea Formaldehyde Foam Insulation sampling was conducted on the site, however, there is a minute potential for UFFI containing materials within debris piles and structures on the site.

Waste Water

No wastewater concerns were observed on the subject site.

Electromagnetic Fields (EMFs)

No Electromagnetic Field testing was conducted on the subject properties. No potential sources of abnormally high EMFs were observed on or near the subject properties.

## VIII. Conclusions

This assessment has revealed no evidence of major recognized environmental conditions on or near the subject site. As a result of the ESA performed on this site, the following recommendations should be considered during site development and/or demolition:

1. All miscellaneous containers should be removed from the site along with their contents and properly disposed of. Care should be taken to protect workers from potentially asbestos, lead, UFFI or other hazardous waste containing materials disturbed or encountered during site cleanup;
2. All debris should be removed from the site and properly disposed of;
3. All structures, structural remnants and their contents should be removed from the site and properly disposed of. Care should be taken to protect workers from potentially asbestos, lead, UFFI or other hazardous waste containing materials disturbed or encountered during demolition and/or removal of structures, structural remnants and their contents;
4. Any water supply wells and/or septic tanks discovered during site preparation should be properly abandoned per state and federal regulations and guidelines and
5. Any petroleum contaminated soil should be collected and removed from the site per state and federal regulations and guidelines.

**Environmental Assessment Association**

**CERTIFICATION AND STATEMENT OF LIMITING CONDITIONS**

**Certification:** The Environmental Inspector certifies to the Buyer, Seller and/or Lender in a transaction as named in the inspection report "Principal Parties"; and the Inspector and the Principal Parties agree that:

1. The Environmental Inspector has no present or contemplated future (a) partnership with Principal Parties nor (b) an interest in the property inspected which could adversely affect the Inspector's ability to perform an objective inspection; and neither the employment of the inspector to conduct the inspection, nor the compensation for it, is contingent on the results of the inspection.
2. The Environmental Inspector has no personal interest in or bias with respect to the subject matter of the inspection report or any parties who may be part of a financial transaction involving the property. The conclusions and recommendations of the report are not based in whole or in part upon the race, color, creed, sex or national origin of any of the Principle Parties.
3. The Environmental Inspector has personally inspected the property, both inside and out and has made visual inspection of adjacent properties, to the extent possible by readily available access. The inspection does not include the removal of any soil, water or air samples, the moving of furniture or fixtures, or any type of inspection that would require extraordinary effort to access.
4. All contingent and limiting conditions are contained herein (imposed by the terms of the inspection assignment or by the undersigned affecting the conclusions and recommendations contained in the report).
5. This Environmental Inspection report has been

made in conformity with and is subject to the requirements of the Code of Professional Ethics of the Environmental Assessment Association.

6. All opinions, conclusions and recommendations concerning the inspected property that are set forth in the inspection report were prepared by the Environmental Inspector whose signature appears on the report.

**Contingent and Limiting Conditions:** The certification of the Environmental Inspector appearing in the environmental inspection report is subject to the following conditions and to such other specific and limiting conditions as are set forth by the Inspector in the report.

1. The Inspector assumes no responsibility for matters of a legal nature affecting the property inspected or the title thereto. The property is inspected assuming responsible ownership.
2. Any sketch appearing in or attached to the inspection report, or any statement of dimensions, capacities, quantities or distances, are approximate and are included to assist the reader in visualizing the property. The inspector has made no survey of the property.
3. The Inspector is not required to give testimony or appear in court because of having made the inspection with reference to the property in question, unless arrangements have been previously made therefor.
4. This report is not intended to have any direct effect on the value of the property inspected but simply to provide a visual Environmental Assessment solely for the benefit of the Principal Parties.
5. The Inspector assumes that there are no hidden, unapparent, or latent conditions or defects in or of the property, subsoil, or structures, other

than those noted on the inspection report or any addendum to the report which the Inspector has included. The Inspector assumes no responsibility for such conditions, or for the inspection, engineering or repair which might be required to discover or correct such factors.

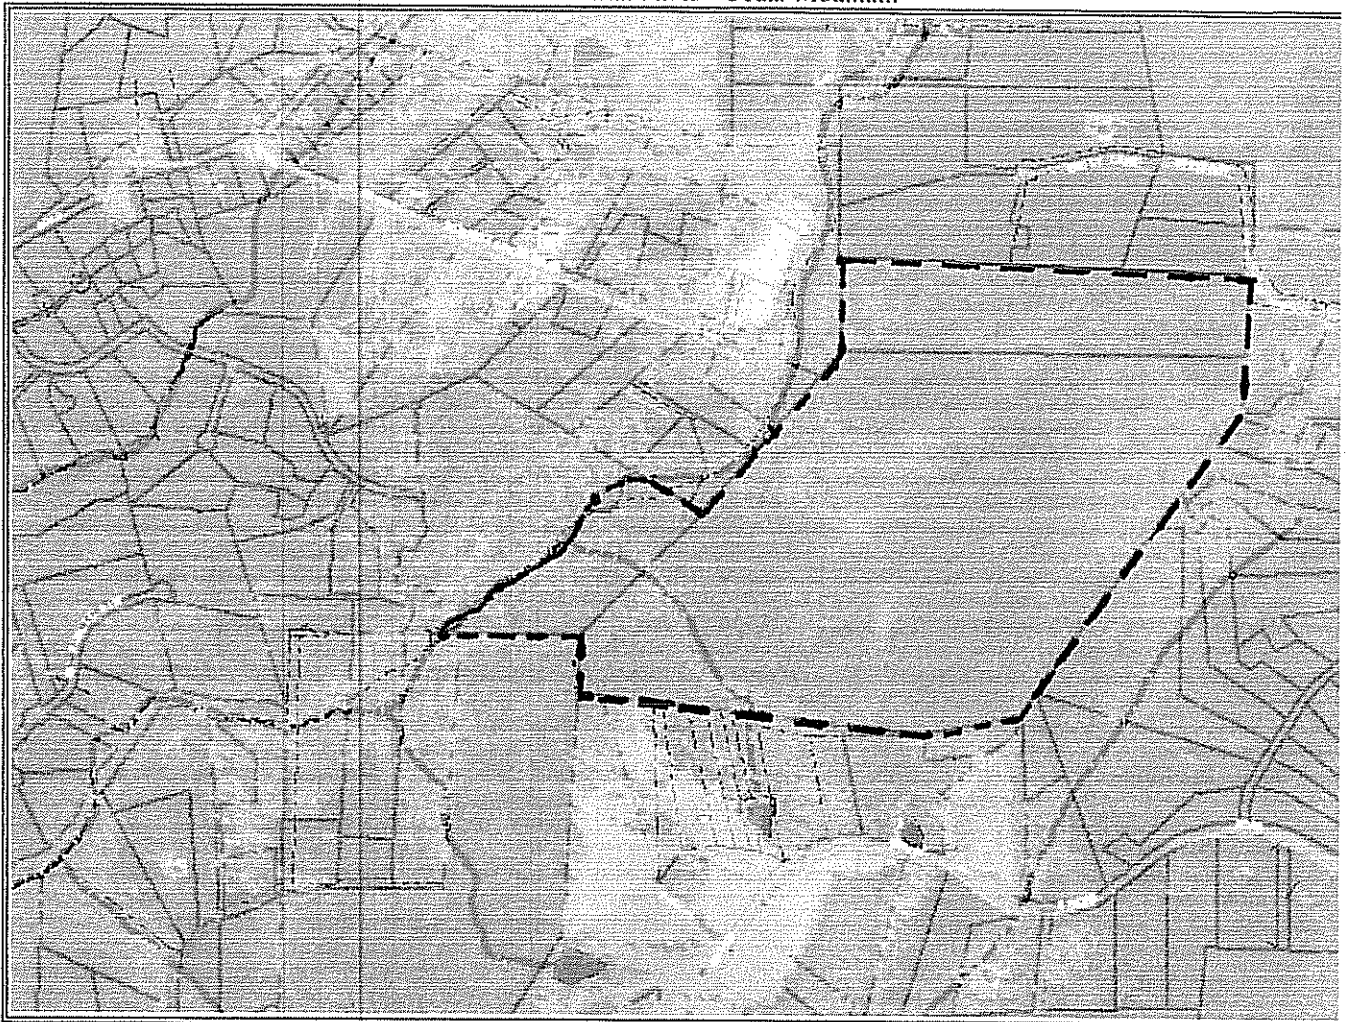

6. Information, estimates and opinions furnished to the Inspector, and contained in the report, were obtained from sources considered reliable and believed to be true and correct. However, the Inspector has made no independent investigation as to such matters and undertakes no responsibility for the accuracy of such items.
7. The Inspection and Inspection Report are made by the Inspector solely for the benefit and personal use of the Principal Parties. Disclosure of the contents of the Inspection Report is

governed by the Bylaws and Regulations of the Environmental Assessment Association. No disclosure may be made of the Inspection Report without the prior written consent of the Inspector and the Inspector undertakes no responsibility for harm or damages to any party other than the Principle Parties.

8. Neither the Inspection Report, any part thereof, nor any copy of the same (including conclusions or recommendations, the identity of the Inspector, professional designation, reference to any professional organization, or the firm with which the Inspector is connected), shall be used for any purposes by anyone but the Principle Parties. The report shall not be conveyed by anyone to the public through advertising, public relations, news, sales, or other media, without the prior written consent and approval of the Inspector.

**Notice of Disclaimer**

Due to the limitations, constraints, inaccuracies and incompleteness of government information and computer mapping data currently available to FirstSearch Technology Corp., certain conventions have been utilized in preparing the locations of all federal, state and local agency sites residing in FirstSearch Technology Corp.'s databases. All EPA NPL and state landfill sites are depicted by a rectangle approximating their location and size. The boundaries of the rectangles represent the eastern and western most longitudes; the northern and southern most latitudes. As such, the mapped areas may exceed the actual areas and do not represent the actual boundaries of these properties. All other sites are depicted by a point representing their approximate address location and make no attempt to represent the actual areas of the associated property. Actual boundaries and locations of individual properties can be found in the files residing at the agency responsible for such information.

**Waiver of Liability**

Although FirstSearch Technology Corp. uses its best efforts to research the actual location of each site, FirstSearch Technology Corp. does not and can not warrant the accuracy of these sites with regard to exact location and size. All authorized users of FirstSearch Technology Corp.'s services proceeding are signifying an understanding of FirstSearch Technology Corp.'s searching and mapping conventions, and agree to waive any and all liability claims associated with search and map results showing incomplete and or inaccurate site locations.

## Environmental FirstSearch Descriptions

**NPL: EPA NATIONAL PRIORITY LIST** - The National Priorities List is a list of the worst hazardous waste sites that have been identified by Superfund. Sites are only put on the list after they have been scored using the Hazard Ranking System (HRS), and have been subjected to public comment. Any site on the NPL is eligible for cleanup using Superfund Trust money.

A Superfund site is any land in the United States that has been contaminated by hazardous waste and identified by the Environmental Protection Agency (EPA) as a candidate for cleanup because it poses a risk to human health and/or the environment.

FINAL - Currently on the Final NPL

PROPOSED - Proposed for NPL

**NPL DELISTED: EPA NATIONAL PRIORITY LIST Subset** - Database of delisted NPL sites. The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

DELISTED - Deleted from the Final NPL

**CERCLIS: EPA COMPREHENSIVE ENVIRONMENTAL RESPONSE COMPENSATION AND LIABILITY INFORMATION SYSTEM (CERCLIS)**- CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL.

PART OF NPL- Site is part of NPL site

DELETED - Deleted from the Final NPL

FINAL - Currently on the Final NPL

NOT PROPOSED - Not on the NPL

NOT VALID - Not Valid Site or Incident

PROPOSED - Proposed for NPL

REMOVED - Removed from Proposed NPL

SCAN PLAN - Pre-proposal Site

WITHDRAWN - Withdrawn

**NFRAP: EPA COMPREHENSIVE ENVIRONMENTAL RESPONSE COMPENSATION AND LIABILITY INFORMATION SYSTEM ARCHIVED SITES** - database of Archive designated CERCLA sites that, to the best of EPA's knowledge, assessment has been completed and has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

NFRAP - No Further Remedial Action Plan

P - Site is part of NPL site

D - Deleted from the Final NPL

F - Currently on the Final NPL

N - Not on the NPL

O - Not Valid Site or Incident

P - Proposed for NPL

R - Removed from Proposed NPL

S - Pre-proposal Site

W - Withdrawn

**RCRA COR ACT: EPA RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM SITES** - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.

RCRAInfo facilities that have reported violations and subject to corrective actions.

**RCRA TSD: EPA RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM TREATMENT, STORAGE, and DISPOSAL FACILITIES.** - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.

Facilities that treat, store, dispose, or incinerate hazardous waste.

**RCRA GEN: EPA RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM GENERATORS** - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984. Facilities that generate or transport hazardous waste or meet other RCRA requirements.

LGN - Large Quantity Generators

SGN - Small Quantity Generators

VGN - Conditionally Exempt Generator.

Included are RAATS (RCRA Administrative Action Tracking System) and CMEL (Compliance Monitoring & Enforcement List) facilities.

**RCRA NLR: EPA RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM SITES** - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.

Facilities not currently classified by the EPA but are still included in the RCRAInfo database. Reasons for non classification:

Failure to report in a timely matter.

No longer in business.

No longer in business at the listed address.

No longer generating hazardous waste materials in quantities which require reporting.

**Federal IC / EC: EPA BROWNFIELD MANAGEMENT SYSTEM (BMS)** - database designed to assist EPA in collecting, tracking, and updating information, as well as reporting on the major activities and accomplishments of the various Brownfield grant Programs.

**FEDERAL ENGINEERING AND INSTITUTIONAL CONTROLS-** Superfund sites that have either an engineering or an institutional control. The data includes the control and the media contaminated.

**ERNS: EPA/NRC EMERGENCY RESPONSE NOTIFICATION SYSTEM (ERNS)** - Database of incidents reported to the National Response Center. These incidents include chemical spills, accidents involving chemicals (such as fires or explosions), oil spills, transportation accidents that involve oil or chemicals, releases of radioactive materials, sightings of oil sheens on bodies of water, terrorist incidents involving chemicals, incidents where illegally dumped chemicals have been found, and drills intended to prepare responders to handle these kinds of incidents. Data since January 2001 has been received from the National Response System database as the EPA no longer maintains this data.

**Tribal Lands: DOI/BIA INDIAN LANDS OF THE UNITED STATES** - Database of areas with boundaries established by treaty, statute, and (or) executive or court order, recognized by the Federal Government as territory in which American Indian tribes have primary governmental authority. The Indian Lands of the United States map layer shows areas of 640 acres or more, administered by the Bureau of Indian Affairs. Included are Federally-administered lands within a reservation which may or may not be considered part of the reservation.

**State/Tribal Sites: NCDENR STATE INACTIVE HAZARDOUS SITES LIST** - database of sites and Facilities that are being investigated due to reported releases of Hazardous substances. Included within this Inactive Hazardous Waste Sites Inventory database are the following classifications: Inactive Hazardous Waste

Sites (IHS), No Further Action Sites (NFA), Duplicate Sites (DS), Inactive Hazardous Waste Sites Priority List Sites (SPL)

**State Spills 90:** *NCDENR* INCIDENT MANAGEMENT DATA (UST and Groundwater) - database of possible releases/spills of contaminants. The data includes media effected, material released, source and site priority.

**State/Tribal SWL:** *NCDENR* ALL PERMITTED SOLID WASTE FACILITIES - database of C&D Landfill, Compost, House Hold Hazardous Waste landfill, Incinerator (Industrial) Landfill, Incinerator (Medical) Landfill, Industrial Landfill, Land Clearing and Inert Debris Landfill, Mixed Waste Processing Landfill, Municipal Solid Waste Landfill, Tire Treatment and Processing Landfill, and Transfer and Processing Stations.

**State/Tribal LUST:** *NCDENR* INCIDENT MANAGEMENT DATA (UST and Groundwater) - database of leaking underground storage tanks. This database is a subset of the Incident Management Data (UST and Groundwater) where the source is a leaking ust. This data is concerned with petroleum storage systems and includes facilities and/or locations that have reported the possible release of contaminants. This database also includes State Spill Sites.

**State/Tribal UST/AST:** *NCDENR/EPA* REGISTERED TANKS and FACILITY DATABASE - database of underground storage tanks registered with the North Carolina Department of Environment and Natural Resources. Inclusion on this list indicates the presence of underground petroleum storage tanks and therefore the potential for environmental problems. It does not necessarily indicate existing problems.  
TRIBAL LAND UNDERGROUND STORAGE TANKS - database of underground storage tanks that are reported to be on Native American lands.

**State/Tribal IC:** *NCDENR* STATE INACTIVE HAZARDOUS SITES LIST SUBSET - database of sites and Facilities that have land use restrictions and are being investigated due to reported releases of Hazardous substances. Included within this Inactive Hazardous Waste Sites Inventory database are the following classifications: Inactive Hazardous Waste Sites (IHS), No Further Action Sites (NFA), Duplicate Sites (DS), Inactive Hazardous Waste Sites Priority List Sites (SPL)

**State/Tribal Brownfields:** *NCDENR* BROWNFIELD PROJECTS INVENTORY - database of Active Eligible Sites, Projects Pending Eligibility, and Finalized Brownfields Agreements.

**Receptors:** *US DOC* SENSITIVE RECEPTORS - 2005 Census Bureau's TIGER (Topologically Integrated Geographic Encoding and Referencing System) database of schools and hospitals. List of schools and hospitals that may house individuals deemed sensitive to environmental discharges due to their fragile immune systems.

**NPDES:** *EPA* THE NATIONAL POLLUTION DISCHARGE ELIMINATION SYSTEM - Database of permitted facilities receiving and discharging effluents to and from a natural source where treatment of the effluent is monitored.

**FINDS:** *EPA* FACILITY INDEX SYSTEM(FINDS)/FACILITY REGISTRY SYSTEM(FRS) - The index of identification numbers associated with a property or facility which the EPA has investigated or has been made aware of in conjunction with various regulatory programs. Each record indicates the EPA office that may have files on the site or facility. A Facility Registry System site has an FRS in the status field.

**TRIS:** *EPA* TOXIC RELEASE INVENTORY SYSTEM (TRIS)– Database that contains information on toxic chemical releases and other waste management activities reported annually by certain covered industry groups as well as federal facilities. This inventory was established under the Emergency Planning and Community Right-to-Know Act of 1986 (EPCRA) and expanded by the Pollution Prevention Act of 1990.

**HMIRS:** *US DOT* HAZARDOUS MATERIALS INCIDENT RESPONSE SYSTEM - Database of information regarding materials, packaging, and a description of events for tracked incidents.

**NCDB:** *EPA* NATIONAL COMPLIANCE DATA BASE SYSTEM - Database of regional compliance and enforcement activity and manages the Pesticides and Toxic Substances Compliance and Enforcement program at a national level. The system tracks all compliance monitoring and enforcement activities from the time an inspector conducts and inspection until the time the inspector closes or the case settles the enforcement action. NCDB is the national repository of the 10 regional and Headquarters FIFRA/TSCA Tracking System (FTTS).

Data collected in the regional FTTS is transferred to NCDB to support the need for monitoring national performance of regional programs.

**PADS: EPA DATABASE OF PCB HANDLERS** - Database of PolyChlorinatedBiPhenol generators, transporters, storers and/or disposers that are required to register with the EPA. This database indicates the type of handler and registration number. Also included is the PCB Transformer Registration Database.

**AIRS: EPA AEROMETRIC INFORMATION RETRIEVAL SYSTEM (AIRS)** – database of detailed information pertaining to sites which submit air emissions reports. Developed under the Clean Air Act, this database also maintains data on compliance status and enforcement actions.

**RADON: NTIS NATIONAL RADON DATABASE** - EPA radon data from 1990-1991 national radon project collected for a variety of zip codes across the United States.

**DOCKET: EPA INTERGRATED COMPLIANCE INFORMATION SYSTEM (ICIS)** - database of federal administrative and federal judicial cases under the following environmental statutes: the Clean Air Act (CAA), the Clean Water Act (CWA), the Resource Conservation and Recovery Act (RCRA), the Emergency Planning and Community Right-to-Know Act (EPCRA) Section 313, the Toxic Substances Control Act (TSCA), the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA or Superfund), the Safe Drinking Water Act (SDWA), and the Marine Protection, Research, and Sanctuaries Act (MPRSA).

**Nuclear Permits: EPA/NRC PERMITTED NUCLEAR FACILITIES** - This database is a comprehensive listing of all facilities which have been issued permits for the handling of radioactive materials, in addition it also contains a complete listing of all licensed and active nuclear power plants located within the United States.  
**THE RADINFO DATABASE** - Database of basic information about facilities that are permitted and regulated for their use and handling of radioactive materials.

**Federal Other: EPA SECTION SEVEN TRACKING SYSTEM (SSTS)** – database of registration and production data for facilities which manufacture pesticides.

**SETS PRP: EPA POTENTIALLY RESPONSIBLE PARTIES (PRP)** – database of parties identified by the EPA as being potential responsible for contamination at a CERCLIS or NPL site.

**State Other: NC DENR North Carolina Dry-Cleaning Solvent Cleanup Act Program (DSCA)** – Database of certified site list and project managers

**DENR DRYCLEANING SITES LIST** – Database of all sites identified by the department with possible dry-cleaning solvent contamination. List includes sites that have been certified into the DSCA Program.
