**Subject: Millcroft 5 Cluster and the Knolls Subdivision Driveway Access in Fearrington Village**

Dear Mr. Keith,

NCDOT has reviewed the site access points and submitted drawings related to the proposed Millcroft 5 Cluster and the Knolls Subdivision entrance onto Millcroft. As you both know, this portion of Millcroft has yet to be added to the State Maintenance System. As such, NCDOT cannot formally grant a driveway permit for these two driveways.

However, NCDOT does appreciate the opportunity to insure that these two new driveways will meet NCDOT standards when Millcroft is added to the State Maintenance System, and have verified that these two new driveways will be placed in a proper location and meet all NCDOT requirements if they are constructed by the submitted plans. This office will promptly issue a driveway permit for these two locations once Millcroft is state maintained.

If you have any questions or concerns please do not hesitate to call or write this office.

Sincerely,

A handwritten signature in black ink that reads "Justin Bullock".

Justin Bullock, E.I.  
Assistant District Engineer
