Angela: I met with Dan and Leonard on Sept 22<sup>nd</sup> regarding water infrastructure to project.

### Discussion with Public Works regarding Water Supply

Carolina Meadows is in the process of converting the campus to a private water system with County maintenance ending at the project entrances (master meters). The lines within the campus will ultimately be owned and maintained by Carolina Meadows once the transition is fully completed.

When the new Health Center is constructed adjacent to Whippoorwill Lane we can provide fire sprinkler service thru a RPZ directly from the 8" WL on Whippoorwill Lane. The potable water will be fed from an existing internal 6" WL on campus.

Based upon this approach Leonard and Dan agreed that we would **not** need a new water loop on the Mt Carmel Baptist Church side of the site.

We will ultimately have (3) master meters. One of which has been installed.

### Future Independent Living Units in Area "C"

I am also attaching (2) conceptual renderings of how the +/- 100 future Independent Living units would be located once the existing Health Center is demolished.

Let me know if you should need anything else.

thx
