---

I am enclosing signed petitions with 160 signatures so far for you to put in the record tonight ( Farrington cell tower proposal). Some were done in person and some signed on line. There should be 9 pages in all.

Thanks you!  
Carrie Klein

~~FOR COMMENTS~~

CARRIE KLEIN

SINCE

Thank you for allowing this public comment time, <sup>as</sup> this is an issue that concerns many of us.

Even after the "Balloon test" my family and I are concerned about the proposed construction of a cell tower on Farrington across from the *very populated* Governor's Village communities..

We moved to Governors Park because we loved the beauty of the area, and we felt this beauty was protected. Now we are very dismayed that giving the go-ahead to this enormous tower is even being considered... and dismayed also that our property value IS at risk.

Despite what "appraisal reports" may say, I have learned 1st hand otherwise. I am in a business that helps homeowners ready their homes for sale... and I have seen that when one of these towers are close by, its harder to sell the home and often it has to be sold for less that market value.

I understand that we need better cellular coverage in the area... but the placement of this tower is wrong. It would be just too close to such an enormously populated area and affect too many. Even with the reduced height of 150 feet it would literally TOWER above the highest trees.

And the balloon test was not at all representative... a pretty yellow ballon on a bright sunny Summer morning tethered by a string, is very different than a 6-8 foot wide solid metal tower with bars across the top towering above everything in its vicinity.

Please put yourselves in our shoes and imagine what it would be like to wake up every morning and see this monstrous tower from your yard. Imagine taking a walk around your neighborhood or the lake and see that huge metal structure marring your view of everything. It will be a constant jolt to the senses daily.

It may be a bit more trouble for AT&T, but Please request that they find another location a bit further away. We have so much truly open space in the vicinity that would not impact so so many. - *Please have them find another willing land owner*

**So I urge you all to please represent us, the citizens and voters of Chatham County on this matter, rather than the financial gains of AT&T. Please vote to deny a permit for this location.**

Thank you !

Also: I HAVE PETITIONS FOR THE RECORD, WITH OVER 200 Signatures!

## PETITION: No Cell Phone Tower Close to Governor's Neighborhoods, Chatham County

We, the undersigned, represent citizens opposed to the placement of a cell phone tower at 464 Old Farrington Road in close proximity to residents, for reasons including, but not limited to, the following:

### Diminished Property Values and Aesthetics

We have a beautiful neighborhood. A cell phone tower—even and especially one that will be made to look like an artificial tree—will mar the beauty of the neighborhood and decrease its desirability for residents and homebuyers alike. According to a 2005 study published in the *Appraisal Journal*, “the results of the sales analysis show prices of properties were reduced by around 21% after a CPBS [cell phone tower] was built in the neighborhood.”

### Possible Health Hazards for Children

“Children exposed to EMFs (electromagnetic fields) are especially vulnerable” (European Parliament Resolution of April 2, 2009). While the Telecommunications Act of 1996 may prohibit challenges of “undesirable health effects,” other countries and various communities in the United States have banned, or are banning cell towers near schools, because of the hazards they pose to children. “Children are at the greatest risk, due to their thinner skulls, and rapid rate of growth” (GeoEngineering Watch). Studies downplaying health hazards were conducted on adults, not on children.

**As the long-term impact of cell phone towers on neighborhoods, and individuals is still unknown, we call for the need for extreme precaution.** Therefore, Chatham County should prevent a cell phone tower from being constructed in close proximity to a residential area. **AT&T and other telecommunications companies should be required to find more appropriate locations and exhaust all alternative scenarios to bring better cell service.**

We proudly join the growing coalition of citizens across the country who are standing up to the intrusion of cell phone towers into residential areas. We urge you to support the residents of these Governor's neighborhoods, and prevent the placement of a cell phone tower at 464 Old Farrington Road.

Sincerely,

Concerned residents, and homeowners who have voluntarily signed this petition.

## PETITION: To Move Cell Phone Tower Further from Governor's Neighborhoods, Chatham County

We, the undersigned, represent citizens opposed to the placement of a cell phone tower at 464 Old Farrington Road in close proximity to residents, for reasons including, but not limited to, the following:

### Diminished Property Values and Aesthetics

We have a beautiful neighborhood . A cell phone tower—even and especially one that will be made to look like an artificial tree—will mar the beauty of the neighborhood and decrease its desirability for residents and homebuyers alike. According to a 2005 study published in the *Appraisal Journal*, “the results of the sales analysis show prices of properties were reduced by around 21% after a CPBS [cell phone tower] was built in the neighborhood.”

### Possible Health Hazards for Children

Whether it can be proven or not, the commonly "perceived" view of an health issue would be detrimental to our neighborhood . While the Telecommunications Act of 1996 may prohibit challenges of “undesirable health effects,” other countries and various communities in the United States have banned, or are banning cell towers near schools ,because of the hazards they pose to children. “Children are at the greatest risk, due to their thinner skulls, and rapid rate of growth” (GeoEngineering Watch). Studies downplaying health hazards were conducted on adults, not on children.

**AT&T and other telecommunications companies should be required to find more appropriate locations and exhaust all alternative scenarios to bring better cell service.**

We urge you to support the residents of these Governor's neighborhoods, and prevent the placement of a cell phone tower at 464 Old Farrington Road.

Sincerely,

Concerned residents, and homeowners who have voluntarily signed this petition.

**Subject:** proposed cell tower

Dear Mr. Bock, I am writing to express concern about the proposed cell tower for the Fearington Road area next to Governor's Village. This tower will dominate our skyline and most probably depress our property values (If it is placed where the ballon tests show, it will most definitely be the dominating sight from my front porch). Please listen to those who bring their concerns before you this evening and realize that we are deeply concerned about the effect this tower will have on our neighborhoods. Thank you for your consideration, Jeffrey Pugh. My address is 12029 Wicker Drive in the Governor's Lake area.

**Subject:** Wireless Telecommunication Permit request by American Tower Corporation and AT&T Mobility at 464 Old Farrington Rd.

June 15, 2014

Dear Commissioner Bock,

The plan to construct a cellular telephone tower on Old Farrington Road on property listed as 464 Old Farrington Road is of great concern to us. The visual impact on the residents of the community will be significant especially for many home owners in Governor's Lake and those of the Whippoorwill Lane area immediately behind the planned site. The adjacent Whippoorwill Lane properties will see the tower and its base. The undisturbed rural quality of the area was a major factor in choosing to purchase homes in this community.

The presence of the tower will further commercialize the Old Farrington Road/Whippoorwill Lane intersection which is in direct conflict with the criteria for choosing to live outside the Chapel Hill city limits. In addition to our objection to the actual presence of the cell tower, we are equally opposed to the process followed as presented by the lawyer for the American Tower Corporation. Mr. Styers indicated at the April 30, 2014 community meeting at the Aquaduct Conference Center that the application process was so far along that it should be considered a done deal and that he had never been denied an application. If he misrepresented the circumstances then it is an indicator of his character. If he is correct, then the constituents of your district have been misrepresented by the process. Our community deserved to be informed about and have input sought far earlier concerning a change in our neighborhood of this lasting impact.

The land owners that have chosen to lease the land for the tower do not live in the community and will not share the burden of its presence, but will benefit financially. Our community does not wish to encourage additional lease or sale of property in this area to other commercial interests. We encourage you to deny the plan for the construction of this tower in accordance with the wishes of the residents.

Sincerely,  
Marjorie Rohrbach  
Michael Poole  
1050 Whippoorwill Lane

Hi Lindsay, I was able to get this wrapped sooner than expected if you would like to insert into the minutes.

-----  
**Chatham County Board of Commissioners' Hearing - 06/16/2014 6:00 pm**

Our family is in opposition to the proposed Cell Tower located at 464 Old Farrington Rd. (known as the Farrington Site) due to the proximity of our home. If the council members have not done so, I invite all of you to come visit the site and see firsthand just how close it is to our community.

It's well documented that this will negatively impact real estate values and subsequently tax revenues for Chatham County. Attached here is a copy of several impact studies including the **Bond and Wang Transaction Based Market Study** which reflected a 20% reduction in sales price for homes in proximity to a Cell Tower. For the 49 homes of Governors Lake which sit directly adjacent to the proposed site that equates to roughly 3.5-4 million dollars in lost property values.

Chatham county is quite large and I understand the desire for better cellular communications but with that open land a more suitable site must exist.

In closing, Im asking our **elected** officials to deny this request until a more realistic and suitable site has been proposed.

Tower hearing comments from Scott Whitney

Thank you for the opportunity to speak.

My name is Scott Whitney, and I live and work in the communities of Governors Village.

I am a business man and my company relies technology and wireless connectivity. Like many who work in technology, I strive to make life better, easier and more convenient, making sure not to diminish quality of life of those who use technology.

I also understand that the builders of this tower have a responsibility to find and construct as tall a tower that they're allowed, to as close to a densely populated areas as possible, for the largest possible coverage footprint-- at the lowest possible cost. However, there is such a thing as too high and too close, and too little time exploring all location options. And despite what we've heard from the attorney, I'm not convinced that Att and its Tower development partners thoroughly explored all their possible location options. After all, there is PLENTY of open space around our communities that could have been considered. I'd like to request that other sites be explored further. I'd like the tower moved further away from our homes and children so that this technology can more fully improve connectivity AND quality of Life. Or at the very least, lower this tower so it is no longer visible from our neighborhood.

The attorney himself just said that there is not a significant difference  
In coverage between 199, 150  
And 125 feet.

We ask that AT&T respect the wishes of its current and Future customers.

Thank you.
