

"Image Of God"

Editor of the Daily News:

The editorials in the Daily News of the past few weeks have been very humane. It is godlike to take a stand that dignifies man. Yes, man the very image of God.

The Daily News has constantly given us wholesome thinking. It has offered sober reasoning to both store operators and to those who were grieved over a practice believed to be inhuman. Such editorials help me and others to have faith in our city and in mankind.

Since we know that the only permanent thing on earth is change, it is important that man accept it as a step in a growing civilization. We accept the great change we have made in travel, communication, manufacturing, farming and the processes of harnessing the natural resources of our world.

Have we been a little slow in changing our way of dealing with man? We must accept the fact that man is made in the image of God. We can do nothing to God. He cannot be punished except by what we do to man. So what we do for, or to man, we do that thing for, or to God. Once this is fully realized, our dear Southland will become a heaven on earth.

Thanks for our Daily News editorials.
