COUNCIL MEMORANDUM NO. 90-32

FROM: Deputy Administrator

DATE: April 19, 1990

RE: North Country Estates Drainage/Sewerage Problems

We have received request for assistance from at least four property owners in North Country Estates. Ground water conditions are causing flooding of basements and septic systems. One person has had the septic tank pumped seven times and another has been unable to use their system for two weeks.

The streetside drainage ditches are inadequate to drain properly, there are no driveway culverts, and there is presently no way to drain the water that ponds on the roads and ditches away from the area.

Some of the property owners expressed an interest in an improvement district (L.I.D.) if the City would form one. Recommend Council approve the expenditure of up to \$2,000 in engineering costs to obtain data and present alternative solutions, with estimated costs to property owners at a general meeting to be conducted at City Hall.

Robert E. Harris  
Deputy Administrator

*approved \$2,000 to  
come out of Engineering
