**SUMMARY STATEMENT:** President Bush has signed an Executive Order allowing local governments to purchase off of the GSA (General Services Administration) Schedule. We currently hold a Technology Grant from the Federal Government specifically for purchasing a digital in-car video/audio recording system capable of outfitting eight (8) patrol cars.

Normally we would have to go out to RFP for such a purchase, but the Federal Government recognizes the GSA Schedule as being a competitive bid process. This allows us to shortcut the time required to go out to bid, do addendums and evaluate those bids.

This particular in-car system is considered one of the best. It is also one of the least expensive considering but still gives us the capabilities we desire. This product is also compatible with our technology plan as we migrate to digital. The technology is simple enough that we can do the install in-house. The GSA Contract # is GS-07F-0239L.

**STAFF RECOMMENDED ACTION:** To Authorize The Purchase Of A Digital In-Car Video/Audio Recording System In The Amount Of \$43,318 From Digitron In Accordance With WMC 5.08.100.B.8.
