### INFORMATIONAL MEMORANDUM 97-32

From: John T. Felton, Public Works Director/City Engineer

Date: May 21, 1997

Subject: Airport Fuel Contract

---

The Administration has been working very hard to supply fuel at the new airport. We have been dealing with Capital Airways for the past eighteen months. For reasons beyond our control or knowledge, Capital Airways has kept postponing finishing the deal and has refused to culminate the deal. In order to get on with the process of developing the airport, they were given until May 16, 1997 to sign the agreed upon contract. To date there has been no contact from Capital and we have deemed our negotiations as having failed.

Two other suppliers have come forth. Service Oil & Gas has made a very good proposal that would have fuel available this summer. Ti-Le-An Management, Inc. has also made a proposal that includes both fuel sales and hanger facilities. We are in the process of evaluating these two proposals and will make a full recommendation to the Council at your next meeting.
