

SUBJECT: Supplemental Appropriation To FY 2002 Capital Budget To Purchase Airport Electronic Security Gates

REQUESTED BY: Public Works

PREPARED BY: Public Works

DATE: September 12, 2001

FOR AGENDA OF: September 24, 2001

SUMMARY:

When the FY 2002 Capital Budget was prepared, full funding for electronic security gates for the airport was inadvertently left out. Ordinance 01-50 will allow this project to be fully funded for a total of \$25,000, the estimated cost for this project.

During the past year, there have been several acts of theft and vandalism at the airport. Because there is no round-the-clock monitoring of the airport grounds, a security gate that allows twenty-four hour access to the airport by pilots and other authorized people is the most cost effective alternative.

FISCAL IMPACT: No Yes, amount requested: \$ 21,650 Fund: General Fund, fund balance

RECOMMENDED ACTION:

It is recommended that Ordinance 01-50 be approved to fully fund the installation of electronic security gates at the airport.
